I'm a passionate, self-motivated PHP Developer who is committed, organised and looking to continue building great web solutions and be part of a team of enthusiasts programmers. My strongest area is REST API's and bespoke builds.

WORK EXPERIENCE

Extreme Creations BACKEND WEB DEVELOPER

At Extreme I work as part of a large team of developers on their custom built eCommerce and REST APIs. Using a strong git-workflow the aim is to modularise code to allow future extensibility and interfacing.

Core technologies include: PHPUnit TDD, Phalcon Framework, MongoDB and Sage Pay. My role involves building API components, working with craft plugins and maintaining Elasticsearch implementation.

Current Role
< 1 Year
Apr 2017-Now

XIVDB.com (14 DB) DEVELOPER AND DIRECTOR

Starting out as a small web crawler I have built this site into massive community database and player tracking website. The site hosts complex features such as; a extensive and open REST API, dynamic character progression, multi-million player daily monitoring and cross-globe server synchronisations (US to Japan). Built in Symfony 3 it hosts several million users a month and maintains a healthy growth forecast. I worked full time on this project after graduating from 2014 to 2015.

Maintainer
6 Years
Dec 2013-Now

joi polloi WEB DEVELOPER

Working to a fast agile plan, my roles included building bespoke CMS system, voting tools and merchandise tracking systems. Working entirely with Symfony 3 and various UI frameworks (bootstrap/Semantic) I integrated into many 3rd party tools such as; Fitbit, AWS, Paypal and SSO integrations.

Over my time my role extended to AWS management and sometimes I even built a frontend using SASS, webpack.

3 Years
Mar 2015-2017

EUI USER SUPPORT TECHNICIAN

Part of my University degree I had the chance to live in Italy and do User Support for the European University Institute. This was my first foot at working in a large professional environment and helped hone my life skills. My roles included; maintain the support desk, classroom and lab computer setup, large scale OS and software distribution (several hundred computers at once) and my long term project involved building much of their intranet and implementing templates.

KEY SKILLS AND TECH

PHP 8+ years

HTML, CSS, JAVASCRIPT 8+ years

MYSQL, POSTGRES 6+ years

SYMFONY 3+ years

NODEJS 4+ years

VAGRANT, DOCKER 1+ year

LINUX (UBUNTU) 3+ years

C#, PYTHON 3+ years

ANSIBLE, AWS 3+ years

EDUCATION

UNIVERSITY OF HUDDERSFIELD

BSc COMPUTING SCIENCE

2009-2013

My studies at the Huddersfield University taught me an array of subjects such as; computation mathematics ½ (Inc. MATLAB), formal aspects of AI in CS (Prolog logic and Java), integrative projects, networking, bots, UML and database management.

UNIVERSITY THESIS

Multi-Client Web Integrations

Investigating the pros and cons of different multi-client web technologies such as query polling and websockets and building a concept application to backup the research.

LEEDS COLLEGE OF TECHNOLOGY

BTEC DIPLOMA IN MEDIA PRODUCTION

2007-2009

Media production course that consisted of: web development, sound in interactive media, 3D modelling in Maya, web animation (rip Flash), working to industry briefs and research techniques.

COCKBURN COLLEGE OF ARTS

GCSE + ICT GNVQ

2001-2006

Walked away with:

- 7 A-C's,
- 4 Distinction pieces of ICT coursework
- 2 Passed ICT exams
